

EV Charger Product Selection Checklist

Use this worksheet to prepare the basic information needed before comparing charger platforms or requesting a quotation.

How to use it

Complete the fields you already know. Unknown items can be left blank and confirmed during product matching.

Project / Buyer Information

Target market / country	Country or market where the product will be sold or installed.
Product direction	AC wallbox, portable charger, DC charger, charging cable, connector or adapter.
Estimated quantity	Trial order, annual plan, project quantity or expected order range.
Target timing	Quotation date, sample timing, project schedule or purchasing window.

Checklist

☐	Required power / current range is identified.	
☐	Single-phase / three-phase requirement is known where applicable.	
☐	Vehicle / charger connector standard is confirmed.	
☐	Indoor / outdoor installation environment is defined.	
☐	Startup method is defined: Plug & Play, RFID, App, QR or remote control where applicable.	
☐	Connectivity requirement is defined: Wi-Fi, Bluetooth, Ethernet, 4G or OCPP where applicable.	
☐	Cable length / socket / tethered-cable preference is defined.	
☐	Target compliance or certification requirement has been listed.	
☐	Branding / packaging requirement has been listed if needed.	
☐	Expected accessories or mounting requirements have been listed.	

Important: Final specifications, functions, certification scope and documentation must be confirmed against the exact selected product and configuration before order approval.
